Giclée Fine Art Prints - Service Information

SERVICE TIME 3 days (add 2 days for canvas stretching)

The term “Giclée Print” (pronounced zhee-clay) refers to an elevation in printmaking technology. Images are printed with archival quality Ultrachrome pigment based inks onto canvas and smooth or textured fine art paper (see below for varieties available). The EPSON STYLUS PRO 9600 large-format printer produces stunning inkjet prints that are ideal for photographers or artists of other mediums who wish to reproduce their artwork as needed, with minimal effort and at a reasonable cost. Resulting prints are widely used for exhibitions, display and decorative purposes.

When printing from digital file

Please provide your digital files set up as 300 dpi, 8 bit flattened TIFF files. Our technicians will perform additional image adjustments if needed for no extra charge.

When printing from original artwork

We will create a professional digital copy from your artwork matched as closely as possible to the original (see Copies from Artwork on page 10 for prices). Our technicians will print from this digital copy and perform additional image adjustments if needed for no extra charge.

When printing from film

We can print from almost any type of film from 110 colour negative to 8 x 10 in transparency. Our technicians will perform a high end scan and adjust the scanned image in photoshop to your given specifications. You can purchase the file we have set up for printing for a highly discounted price.

GICLÉE PRINT SURFACES AVAILABLE

Canson Infinity Matte Canvas
 390gsm

A premium acid free canvas with a pure white tone that has been specially developed for professionals who demand a product capable of producing precise images with very high resolution. In addition to offering outstanding water resistance, this canvas stretches and mounts with ease. The canvas will not yellow, crack or curl and is an ideal choice for a variety of applications including portraiture and fine art photography.
Stretching for hanging and display is available on canvas prints.

Innova Softex Fine Art Paper
 315gsm

Museum quality natural white, course structured, acid free paper. It has a natural white finish with a slightly structured, soft-textured surface equivalent to a traditional etching fine art paper making it ideal for digital fine art reproductions. The surface has a special matte coating, designed for high quality fine art and photographic reproduction.

Hahnemühle Photo Rag Paper
 308gsm

The fine, smooth surface and feel of Photo Rag make this paper very versatile and it is ideal for printing both black and white and colour photographs and art reproductions with impressive pictorial depth. It’s surface is relatively smooth, not perfectly smooth like a hot pressed paper but smooth enough that it’s very, very slight texture does not interfere with image detail.

Hahnemühle Albrecht Dürer Textured Fine Art Paper
 210gsm

Named after the German renaissance watercolour painter this 50% rag-based paper with a subtle textured surface lends an artistic feel to art reproductions and photographs.

Other specialised Giclée print surfaces are available, please ask one of our staff for more information.
